Interactive Whiteboard Trainings

Supporting continuous professional development of our teachers and integrating new technologies in teaching are the main goals of the European School. The school develops consistently and tends to reflect on and respond to the ever-changing world. The European School starts the new school year with new beginnings.

Interactive whiteboards and document scanners are getting installed at Science Labs, FabLab and regular classrooms to support students' development and make both -face-to-face or distance learning more interactive.

12 experts from Innovative Technology Department conducted trainings for the faculty, gave the teachers detailed instructions on applying new technology and benefits of bringing them into classroom.
